The 700 M euros and CVAE which was to be a lasting compensation, but this year I will have to write that of lost time! » Carole Delga sounded indignant. The President of Gerard Larcher freshly re-elected (The Republican), a week ago, for his sixth mandate also insisted in his speech, on the imperial necessity of a shock of decentralization, and this by recalling the old promise formerly promised by the president of the Republic.

"WE'D LIKE YOU TO HOLD OUR HAND"

France is threatened in its republican foundations and do not be mistaken for an adversary and we must fight against exorcisms and populism; If we ever leave the extreme right in control and we will never accept us who are republicans.

We are proud to this partial and generous France by liberty, equality, fraternity, and also law and we have the combat strength and it is we who will guarantee it. The audience thus applauds the words of Carole Delga, which, repeats to the first minister that she tends to him "a caressing benevolent hand" consolidating his words thanking the President of the Senate for his support, also defending the territories versus the State "Mr Larcher, tireless defense of decentralization for his fidelity and his supports on my ratings for the Republic and acting so that all French people are considered "...

The PM, Elisabeth Borne recalled "A year ago, before you, I made a commitment: always dialogue, always build common solutions. This conviction of the effectiveness of the dialogue, I have forged it throughout my career, as a prefect of the region, as a business leader, as minister and Prime Minister."

The PM, Elisabeth Borne has on her side the three trails pillars and has her sight of the functioning of tandem lines "confidence, consultation, differentiation", as well as "the third pillar of the state-regions relationship".

She quoted as an example of consultation the adaptation of "zero net artificialization" The head of the government, argued in response to regions to grant them active autonomy "The subjects are numerous: ecological transition, mobility, attractiveness, full employment, equal opportunities. Faced with these issues, we must all move forward in the same direction, with optimism, but also with lucidity."../
